

Red Disposable Plastic Water Soluble Bags For Hospital Laundry

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Ciyu
- Certification: FDA,SGS, TDS
- Model Number: Ciyu30001
- Minimum Order Quantity: 10000pcs
- Price: USD0.2-USD0.38/pcs
- Packaging Details: Carton+Pallet
- Delivery Time: 10-15days
- Payment Terms: L/C, T/T
- Supply Ability: 8000pcs/day

Product Specification

- Material: Polyvinyl Alcohol(PVA)
- Size: 660*840,710*990,914*990
- Color: Natural, Red, Blue, Orange
- Usage: Hospitals, Nursing Home
- Feature: Water Soluble
- High Light: Disposable Laundry Bags, Biodegradable Laundry Bags
- Highlight: **Disposable Water Soluble Bags, Disposable Plastic Water Soluble Bags, Hospital Disposable Laundry Bag**

Material:	Polyvinyl Alcohol(PVA)	Size:	660*840,710*990,914*990
Color:	Natural, Red, Blue, Orange	Usage:	Hospitals, Nursing Home
Feature:	Water Soluble	Thickness:	25-45microns

Water Soluble Laundry Bags

PVA Water Soluble Laundry Bag is a convenient precaution tool that enables soiled linen handlers to isolate, store, transport and clean washable dirty items. The bags can be used as integral liners in collection containers or as independent storage bags for soiled or contaminated items (i.e. used continence pads and bed linen) prior to laundering, thus minimising the risk of cross contamination or direct exposure to waste materials or body fluids. Closed Laundry Bags can be placed directly into the washing machine. During washing, the water soluble transparent bags dissolve, releasing the contents into the wash.

PVA Water Soluble Laundry Bags with soluble integral ties are made from transparent PVA (polyvinyl alcohol) film. PVA is a non-toxic environmentally friendly biodegradable material that dissolves in water. PVA is commonly used in packaging of a variety of goods, such as plant and vegetable seeds, textiles and clothing, unfinished embroidery items, fresh foods and also in making of water soluble laundry bags for better hygiene and easy handling of soiled washable items.

The Laundry Bags begin to dissolve in hot at 60° C and over. They are made from a transparent 25-40 microns thick PVA film in natural transparent colour. When washing in water below 60° C, you may have to remove remains of the bag from the washing machine at the end of the washing programme.

Soluble Laundry Bags User Benefits:

- Effective method of isolating transporting and laundering soiled linen.
- Improved hygiene and reduced risk of cross-contamination from soiled articles.
- Reduction in hazards associated with storage and cleaning of contaminated washable items.
- Prevention of leakage from items heavily soaked in urine.
- Additional protection from pathogens found on soiled linen.
- Made from environmentally friendly PVA (polyvinyl alcohol)
