Basic Information

- Place of Origin: China
- Brand Name: Ciyu
- Certification: FDA,SGS, TDS
- Model Number: Ciyu30001
- Minimum Order Quantity: 10000pcs
- Price: USD0.2-USD0.38/pcs
- Packaging Details: Carton+Pallet
- Delivery Time: 10-15days
- Payment Terms: L/C, T/T
- Supply Ability: 8000pcs/day

Product Specification

- Material: Polyvinyl Alcohol(PVA)
- Usage: Hospitals, Nursing Home
- High Light: Disposable Laundry Bags, Biodegradable Laundry Bags
- Color: Natural, Red, Blue, Orange
- Feature: Water Soluble
- Size: 660*840,710*990,914*990
- Highlight: **50 Microns Disposable Washing Bags, 50 Microns PVA Washing Bags, Hospital Dissolvable Washing Bags**

Property	Water-solubility
Usage	Hospital, nursing home
Style	Plain
Package	25pcs/pack or roll ; 100 or 200 pcs/ctn
Certificates	ISO9001: 2008

Water soluble laundry bags are an effective closed handling system in the medical industry where safety and high sanitary standards are vital to prevent the spread of infectious components. Handling is safer when the contaminated linen or clothing is isolated in a water soluble bag from the point of filling to the laundry machine or disposal point.

PVA bags can be made warm or hot water soluble to handle moist linen. The bags dissolve completely in the laundry, leaving no contaminated packaging waste. In addition, PVA bags are biodegradable and have odor barrier properties.

Water soluble biohazard bags can also be used for the safe transport of medical and scientific instruments until they can be sterilized. PVA water soluble laundry bags come pre-made and supplied in boxes with integrally attached pink soluble tie tapes.

Advantages of water soluble laundry bag for health care:

- *The infected contents of the laundry bag does not need to be handled by staff until the wash and drying cycles are completed.
- * The bags will dissolve completely in water during the washing process. They leave no potentially infected waste and do not pollute the water.
- * The bags ensure the safe transport of contaminated material or instruments for staff in hospitals. Once the linens/ instruments are sealed in the bags, the risk of contamination and infection is minimized.
- * Water soluble bags are anti-static, non-toxic and fully biodegradable. Tests have verified that the bags are impermeable to bacteria and virus.
- * Water soluble laundry bags have excellent gas barrier properties.
