Water Soluble Laundry Bag	
Material	Polyvinyl Alcohol (PVA)
Size	660*840,710*990,914*990mm, 25-40 microns in thickness
Color	Red, Yellow, Natural, Customized
Property	Water-solubility
Usage	Hospital, nursing home
Style	Plain
Package	25pcs/pack or roll ; 100 or 200 pcs/ctn
Certificates	ISO9001: 2008

Our laundry bags dissolve completely in the wash, leaving no potentially infected plastic waste. The contents of the bags need not be handled until the wash and dry cycle is complete.

Our laundry bags are a cost-effective solution which substantially reduces the risk of contamination and cross-infection to staff, patients and laundry personnel.

Our laundry bags are completely soluble and biodegradable. Contaminated linen is placed in the bag which can then be sealed with the attached cold water soluble tie tape. The filled bag is then transferred to the laundry and put unopened into the washer.

### Laundry bags are available in the following grades:

Cold Water Soluble - Dissolves in cold water wash at 25°C.

Warm Water Soluble - Dissolves in warm water wash at either 40°C or 50°C.

Hot water soluble - Dissolves in hot water wash at 65°C. Has a high resistance to moisture and dampness especially for use with wetter contents.

Sizes and Options

### Laundry bags are manufactured to standard sizes:

26" x 33" (660mm x 840mm) & 28" x 39" (710mm x 990mm)

### Standard available colours :

clear, red & blue

All are available with a clear or red coloured cold water soluble tie.

Laundry bags can also be manufactured in sizes and colours to customer's requirements (minimum quantities apply).
