## Product Description

### Disposable Biodegradable Clear PVA Hot Water Soluble Bags

Water soluble medical disposal bags for infection control including water soluble laundry bag and medical instrument disposal bag are mainly used to collect the contaminated medical instruments, articles, patient bed sheets, linens and treatment appliances in hospitals and nursing homes. After sealing up the disposal bags, the contents inside the bag do not expose to outside environment during the whole process of conveying, washing, disinfection and drying. The water soluble bag can dissolve completely during washing and disinfection process without any polluting residual.

#### Benefits:

---- Avoid direct contact between the contaminated content inside the bag and the operator until the washing and drying cycle is completed, minimizing cross-infection and germs spread;

---- Avoid contaminated medical waste to be generated as the disposal bags completely dissolve in water, eliminating the traditional treatment by incineration or burying and reducing the treatment cost;

---- Greatly improve the hygiene of working environment, reduce working intension and enhance the labor protection.
