

Transparent 60 Microns Embroidery PVA Water Soluble Film

Our Product Introduction

for more products please visit us on pvawatersolublebag.com

Basic Information

- Place of Origin: China
- Brand Name: Ciyu
- Certification: SGS,MSDS
- Model Number: Ciyu40001
- Minimum Order Quantity: 10Rolls
- Price: USD0.2-USD0.38/pcs
- Packaging Details: Carton+Pallet
- Delivery Time: 10-15days
- Payment Terms: L/C, T/T
- Supply Ability: 6,000 kgs per day

Product Specification

- Material: PVA
- Feature: Water Soluble
- Color: Transparent
- High Light: PVA Film Roll, Water Soluble Plastic Film
- Processing Type: Blow Molding
- Length: 100-500yards/roll
- Thickness: 25-60microns
- Width: 1000-1600mm
- Highlight: 60 Microns Water Soluble Film ,
1600mm PVA Water Soluble Film ,
60 Microns PVA Film Roll

Product Description

Cold Water Soluble PVA Film for lace embroidery

Embroidery PVA Water Soluble Film 25 - 60 Microns Thickness Optional

20C Cold Water Soluble PVA Film for Embroidery is widely applied to the computer embroidery, which attaches to the back of the fabric. Compared with the Hot Water Soluble Paper, it will completely dissolve within 10-30s in the 20°C water without any residues and toxicants, which keeps the good quality of embroidery patterns and environmentally friendly.

With appropriate strength, it can meet the requirements for all kinds of embroidery crafts. The embossing design avoids the needle jumping and skewing. Low flexibility avoids thread breaking. Environmentally friendly. Under normal water temperature, it is different for cloth materials and embroidery threads to discolor or fade.

Product Type:	20C Cold Water Soluble PVA Film for Embroidery
Material:	100% PVA(Polyvinyl alcohol) Fiber
Technics:	Blowing
Color:	Transparent
Feature:	Eco-Friendly, Water Soluble, Other
Thickness:	25um-60um
Width:	Normally 160cm(63inch) or 100cm(39.4inch)
Water Temperature:	20°C
