

Blow Molding 30Mu Polyvinyl Alcohol PVA Water Soluble Bag

Our Product Introduction

for more products please visit us on pvawatersolublebag.com

Basic Information

- Place of Origin: China
- Brand Name: Ciyu
- Certification: FDA,SGS, TDS
- Model Number: Ciyu10001
- Minimum Order Quantity: 10Rolls
- Price: USD0.02-USD0.38/pcs
- Packaging Details: Carton+Pallet
- Delivery Time: 10-15days
- Payment Terms: L/C, T/T
- Supply Ability: 6,000 kgs per day

Product Specification

- Usage: Packaging Film
- Feature: Water Soluble
- High Light: PVA Film Roll, Water Soluble Plastic Film
- Processing Type: Blow Molding, Casting
- Type: Water Soluble Film
- Material: PVA
- Highlight: 30Mu PVA Water Soluble Bag, PVA Water Soluble Packaging Bag, PVA Water Soluble Film

Product Description

Environment - Friendly Polyvinyl Alcohol Film Pva Water Soluble Packaging Bag

Introduction:

We are one of the leading suppliers and exporters of water soluble films. These are available in innovative designs, pattern and styles. Water-soluble PVOH film is made from water soluble polymers, having the appearance of a common plastic film. It has unique characteristic of completely dissolving in water at room temperature. The dissolved film disappears in water like sugar or coffee and the ingredients of the film change their appearance but remains present as dissolved solids in water.

The rate of dissolution depends on agitation, water temperature, amount of water and thickness of the film. The PVOH has proved to be a revolutionary film with its multiple uses which has been acknowledged and hailed by not only satisfied users but also ENVIRONMENTAL PROTECTION AGENCY (E.P.A.) strongly recommends in packing agriculture chemicals and pesticides in this water soluble film as it is completely biodegradable and safe for environment and with time to come the use of this film not only going to increase but also indispensable because of its biodegradability, eco-friendly with multiple uses.

The Time of Dissolving of the PVA Film

(eg: thickness:30Mu temperature:25 .)

Type	The beginning of dissolving (sec.)	Total dissolving (sec.)
Quick	<25 sec.	<3 minutes
Middle	<1 minute	<30 minutes
Difficult	can't dissolve when temperature is under 30	total dissolving when temperature is over 60

According to the time of dissolving, the film has three types: Quick, Middle and Difficult. Thicker film dissolve slowly, and the higher the temperature, the faster the film would dissolve in water.

Item	Fast soluble film	Medium Soluble Film	Difficult soluble film
Applications	Agrochemical packing, Herbicide packing bags, Artificial-haired, Embroidery, Cleansing products packing bags, Laundry bags,	Seed tapes, Compound film for food packing, Laundry bags	Textile packing bags, Buffer air cushion of packaging, Laundry bags, Mode release

Applications:

1. Packaging of Infection Control

Laundry bags are the most effective system available for the collection and transport of infected linen to combat the risk of contamination and cross-infection to staff and laundry personnel. The contents of the bags need not be handled until the wash and dry cycle is complete.

2. Clothes packing

PVA water-soluble film has better quality than other packing material. It is non-static, highly transparent and lustrous. It is good barrier to air and could be used for packing in order to keep nitrogen from contacting with clothes and avoid textile becoming yellow.

3. Mold-releasing

PVA film can be used as an excellent mold releasing agent when parts are manufactured with unsaturated polyester epoxide resin or other thermosetting resin.

4. Commodity packaging

Since the advantage in the water solubility and environmental friendly characteristic, the water-soluble PVA film can be used widely, in the field of commodity packaging, such as the packaging of detergent and environment friendly shopping bags.
