

## Food PLA Transparent 160cm PVA Water Soluble Release Film

## **Basic Information**

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity:
- Price:
- · Packaging Details:
- Delivery Time:
- Payment Terms: L/C, T/T
- Supply Ability:

- 10Rolls USD0.2-USD0.38/pcs
- Carton+Pallet

China

- 10-15days
- 6,000 kgs per day

## **Product Specification**

Food PVA Water Soluble Release Film,	

160cm PVA Release Film, 160cm Water Soluble Release Film

**Our Product Introduction** 

## **Product Description**

Pla isPolylactic acidThe English abbreviation is written as: polylactic acid

Pla Transparent Thermal Shrink Film Food And Beverage Electronic Products Packaging

Polylactic acid, also known as polylactide, belongs to the polyester family.Polylactic acid is a polymer obtained by polymerizing lactic acid as a main raw material. The raw material source is sufficient and can be regenerated, and corn, cassava and the like are mainly used as raw materials.The production process of polylactic acid is non-polluting, and the product can be biodegraded to achieve circulation in nature, so it is an ideal green polymer material.

Product Type:	packing film
Material:	pla
Production Type:	two-way stretch
Thickness:	0.02-0.12mm
Feature:	Complete degradation
Length:	500-2000m
Color:	Transparent
Width:	20-200cm

The main purpose

Products are mainly used in the processing of packaging, electronics and other fields.

Performance characteristics

- Excellent printability Excellent transparency Uniform thickness
- Smooth and smooth surface 
  Good mechanical adaptability
