## Product Description

### 25 Micron PVA Resin Water Soluble Film Embroidery Backing

Embroidery PVA Water Soluble Film available in 25-60 microns thickness options. This 20°C Cold Water Soluble PVA Film is specifically designed for computer embroidery applications, where it attaches to the back of fabric substrates.

Unlike traditional Hot Water Soluble Paper, this innovative film dissolves completely within 10-30 seconds in 20°C water without leaving any residues or toxic byproducts. This ensures optimal embroidery pattern quality while maintaining environmental sustainability.

#### Key Features & Benefits

- Appropriate strength to meet requirements for various embroidery crafts
- Embossing design prevents needle jumping and skewing during embroidery
- Low flexibility minimizes thread breaking incidents
- Environmentally friendly composition
- Prevents discoloration or fading of cloth materials and embroidery threads under normal water temperature conditions
